

Data Collection

Download The Dataset

Date	31 October 2022
Team ID	PNT2022TMID04987
Project Name	Developing A Flight Prediction Model Using Machine Learning

Download The Dataset

- ❖ ML depends heavily on data, without data, it is impossible for an “AI” to learn. It is the most crucial aspect that makes algorithm training possible. In Machine Learning projects, we need a training data set. It is the actual data set used to train the model for performing various actions.
- ❖ There are many features that are responsible for Flight Delays Prediction e.g. Flight Number, Month, Day of Month, Day of Week, Origin, Destination, etc. For the better prediction of the Flight Delays Prediction, we should consider as many relevant features as possible.
- ❖ You can collect datasets from different open sources like kaggle.com, data.gov, UCI machine learning repository, etc.
- ❖ You can download the dataset from the link given below
